EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims: claim 1, line 10 after "*information*" change "form" to --from--;

Allowable Subject Matter

2. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-30 are found to be in condition for allowance.

Reasons for Allowance

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a polarization means comprising a first area which allows said polarized light of said image information from said first region, the polarization direction of which is rotated to enter; a second area which allows said polarized light of said image information from said second region to enter; and a second phase retardation plate for

Art Unit: 2621

rotating the polarized light of said image information from said second region in a direction opposite to that of said first phase retardation phase, said second phase retardation plate being provided in said second area on the image display section side.

The closest prior art (Faris US Patent no. 6,333,773) discloses a similar polarization means, however, Faris fails to particularly teach or suggest *"polarization means comprising a first area which allows said polarized light of said image information from said first region, the polarization direction of which is rotated to enter; a second area which allows said polarized light of said image information from said second region to enter; and a second phase retardation plate for rotating the polarized light of said image information from said second region in a direction opposite to that of said first phase retardation phase, said second phase retardation plate being provided in said second area on the image display section side."* as claimed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
